

Eric Denhoff

He is the President and CEO of the Canadian Hydrogen and Fuel Cell Association (CHFCA), the national association for Canada's hydrogen and fuel cell sector.

Eric has served as a Chief Treaty Negotiator for the Government of Canada and as a Chief Treaty Negotiator for BC Hydro.

He is a respected leader who has made an impact through his extensive career in government and the private sector. The Canadian hydrogen and fuel cell sector will benefit from his depth of experience in complex, consensus-building roles.

Over his extensive career, he has also built a solid foundation of organizational leadership experience in diverse roles including Chairman and Acting CEO of BC Transit, Chairman of Western Executive Selection, Chairman of the SNC-Lavalin B.C. Development Board, and as Deputy Minister assigned to BC Trade. He has significant international trade and business development experience in Europe and Asia representing both private and public sector organizations.
