

Benjamin K. Sovacool

Benjamin K. Sovacool is currently a Visiting Associate Professor at Vermont Law School. His research interests include the barriers to alternative sources of energy supply such as renewable electricity generators and distributed generation, the politics of large-scale energy infrastructure, designing public policy to improve energy security, and building adaptive capacity and resilience to climate change in least developed Asian countries. He has served in advisory and research capacities at the National University of Singapore, U.S. National Science Foundation's Electric Power Networks Efficiency and Security Program, Virginia Tech Consortium on Energy Restructuring, Virginia Center for Coal and Energy Research, New York State Energy Research and Development Authority, Oak Ridge National Laboratory, Semiconductor Materials and Equipment International, U.S. Department of Energy's Climate Change Technology Program, and the International Institute for Applied Systems and Analysis near Vienna, Austria. He has also consulted for the Asian Development Bank, United Nations Development Program, and United Nations Economic and Social Commission for Asia and the Pacific. He is the author or editor of eight books and more than 130 peer reviewed academic articles on various aspects of energy and climate change, and he has presented research at more than 60 international conferences and symposia. He is a frequent contributor to Energy Policy, Electricity Journal, Energy, and Energy for Sustainable Development.

His presentation on: **Renewable Energy Markets in Developing Countries: Experience from Four Solar Home System Programs**
