

Renewable Energy and Environmental Sustainability

An Open Access journal publishing innovative papers in Renewable Energy. Types of article include research articles, review articles, novel applications, theoretical analysis and technologies, and Editorials covering areas including efficiency improvement, energy conservation and sustainability, policy issues and education for sustainable environment and finance.

Highlights

- Rigorous peer review
- Strict ethical policies in accordance with the COPE code of conduct
- Compliant with all open access mandates
- Author services: search engine, article metrics, bookmarking
- Fair author rights: CC-BY Creative Commons license
- Reader services: email alerts, RSS Feeds, Crossref® and DOI

Official Journal of
World Renewable Energy Congress

REES is an
Open Access journal

Editor-in-Chief

Prof. Ali Sayigh

Editor-in-chief *Chairman of World Renewable Energy Congress, UK*

Graduated from London University and Imperial College with a BSc, DIC, and PhD. He is a Fellow of the Institute of Energy, a Fellow of the Institution of Electrical Engineers, and a Chartered Engineer. In 1990, he established the *World Renewable Energy Congress (WREC)* and in 1992 the *World Renewable Energy Network (WREN)*. Prof. Sayigh has edited, contributed and written more than 32 books and published more than 500 papers in various international journals and conferences.

Associate Editors

Dr. Jazaer Dawody

Associate Editor for Sustainable Transportation
Volvo Technology Corporation, Gothenburg, Sweden

PhD in Material Science from Chalmers University of Technology and Director for R&D laboratories at Volvo Group Trucks Technology. She is responsible for the operation and development of a set of laboratories dedicated for energy conversion and propulsion technology development. She has published several scientific papers on catalysis for exhaust gas after treatment and fuel reforming for hydrogen generation.

Dr. Eftichios Koutroulis

Associate Editor for Photovoltaic Technology
Laboratory for Electric Circuits and Renewable Energy Sources, Technical University of Crete, Greece

PhD from the School of Electronic and Computer Engineering of the Technical University of Crete, where he is currently an Associate Professor. His research interests include the design of photovoltaic and wind energy conversion systems, power electronics and the development of microelectronic energy management systems for Renewable Energy Sources applications.

Dr. Neveen Hamza

Associate Editor for Sustainable and Low Energy Architecture

Senior Lecturer in the School of Architecture, Planning and Landscape, Newcastle University, UK

PhD from Newcastle University and the Vice-Chair of the International Building Performance Simulation Association, England. She is on the Board of Directors of a number of organisations working on net-zero energy building conservation. She has over 80 research publications and research grants in building and urban energy performance evaluation in developed and developing countries.

Prof. Louis Lamarche

Associate Editor for Geothermal Energy
École de Technologie Supérieure, Université du Québec, Canada

Professor in the Department of Mechanical Engineering and PhD in aeronautics from the Free University of Brussels. He worked on energy issues, particularly in the thermal related subjects and is involved in the modeling of thermal storage and geothermalsystems and in thermal solar systems and heat pumps. He supervised several graduate students, is an examiner for several scientific journals, and is the author of many articles published in scientific journals and conferences.

Dr. Christiane Herrmann

Associate Editor
Leibniz Institute for Agricultural Engineering and Bioeconomy e.V. (ATB), Department of Bioengineering, Potsdam, Germany

Engineer in Environmental Science and a PhD in Agricultural Science from the Humboldt-University of Berlin. She is the head of a bioenergy laboratory with focus on the development of advanced bioconversion and anaerobic fermentation technologies. Dr. Herrmann has published several journal articles and serves as a reviewer for 18 scientific journals. She is a member of the guideline committee 'VDI 4630 – Fermentation of Organic Materials' of the Association of German Engineers.

Dr. Ian Masters

Associate Editor for Wave and Tide Energy
Associate Professor at the College of Engineering and Head of the Marine Energy Research Group at Swansea University, UK

Founder of the Marine Energy Research Group and is author of over 140 academic papers and 9 patents. His research areas include tidal current turbines, tidal range technology, wave energy and multiple use of space. He specialises in the development of computational models and has an interest in the link between design and cost of energy in order to develop cost effective ocean energy devices.

Mr Rainer Hinrichs-Rahlwes

Associate Editor for Policy, Education and Sustainability
Vice-President: European Renewable Energies Federation (EREF), Board Member: German Renewable Energy Federation (BEE), Germany

Experienced renewable energy expert, who was Director General of the German Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU). Mr. Hinrichs-Rahlwes is the Chairman of BEE's working group for European and international affairs. He is a steering committee member of the Global Policy Network REN21, and a member of the WREN-Council and Chairman of WREN's Policy Committee.

Prof. Wen Zhong Shen

Associate Editor for Wind Energy
Fluid Mechanics Section, Department of Wind Energy, Technical University of Denmark

PhD in fluid mechanics from Paris-Sud University, France. He is currently Professor at the Department of Wind Energy, Technical University of Denmark and his working areas include wind turbine aerodynamics, wind turbine aero-acoustics, computational fluid dynamics, wind turbine airfoil and rotor design, and wind farm layout optimization.

Prof. Xiaoqiang Zhai

Associate Editor for Solar Thermal Technology
Institute of Refrigeration & Cryogenics at Shanghai Jiao Tong University, China

PhD from Shanghai Jiao Tong University. He has worked in the Institute of Refrigeration and Cryogenics of Shanghai Jiao Tong University since 2006 and his research interests include renewable energy technologies and green building energy systems.
